

Our Patches

We embroider our patches with high-quality embroidery thread on white embroidery felt.

The embroidery felt is made of 100% polyester, washable up to 30°C and colourfast.

The embroidery thread consists of 100% viscose and has a silky sheen.

The embroidery thread colors can of course be freely selected.

If you would like a patch that underlays fabrics, we can do that after we

look if we have these on stock. Otherwise you could also send your own pieces of fabric :)

We will let you know the required sizes of the pieces of fabric if you have decided to do this.

We leave a very generous border around the design after embroidery so you can cut to size according to your needs and preferences.

As a rule, we do not use an iron-on fleece (e.g. Vliesofix) as a base, our motifs are then sewn on by you with the sewing machine or by hand.

On request we can of course also offer it :)

The prices of our patches depend on the size of the motif and the yarn consumption.

We can only tell you the exact price after we have discussed your wishes :)

The patches are only embroidered after receipt of payment and then within approx. 3-5 working days on the way to you.

But it can also occur here when there is a high volume of orders or during our holiday periods that there will be slight delays!

But we will discuss this with you individually before we accept an order :)

If we receive an order by you, we will send you an invoice by email with all the agreed information and payment options :)

Do you have any questions? Then just write to us: MariLena-Stoffzaubereien@web.de
