

PRODUCT CODE

4139

Off-Line Socket Driver with Lock 1/4"D

SELLING POINTS

Using the same principle as the Kamasa Off-line Driver this is a great product for working in tight conditions.

It makes the original universal joint redundant. It can be used using the Off-line feature and also as a fixed drive. As an additional feature the socket can be locked onto the Drive

Also available in 1/2"D & 3/8"D
