## Spectra Geospatial Ranger 7 v2 - Available November

Trimble is pleased to announce the new Spectra Geospatial® Ranger 7 controller - v2 model, now including improvements to battery life and extra storage capacity.

Trimble Mobile Computing Solutions (MCS) aims to provide product refreshes in order to keep collectors current. These product refreshes provide component upgrades as well as addressing obsolete components. They also strive to make incremental improvements based on user feedback. This latest version of the Ranger 7 has accomplished these goals and in doing so increased the battery life and internal storage capacity.

Using the same batteries that are available for the initial Ranger 7, battery life has increased from 5 hours to 8 hours. The internal storage capacity has doubled from 64 GB to 128 GB.

These new units will continue to include the same accessories and are compatible with all other Ranger 7 accessories.
